Building Your Carbon Neutral Future

HempipANEL

*your alternative prefinished wall panel solution replacing
concrete,
masonry,
drywall panels
and all the insulation that comes with it...*

HempiPANEL

EVOLUTION IN BIO-COMPOSITES

With advanced material science knowledge and new technological developments, we manage the complexity of using high performance plant-based natural material and formulate a mix of environmentally friendly binders to create prefinished prefabricated composite wall panels that are durable, energy saving, water-resistant, building code compliant, and easy to install.

Bio-fiber (left) and resin

REGENERATIVE

We understand that in your pursuit of creating beautiful buildings, you are just as conscious of protecting the environment.

Sharing your vision of developing healthy built environment in harmony with nature, we exercise a rigorous approach in ensuring that our products has a low ecological footprint. In fact, we take pride that our products can achieve a cradle to cradle lifecycle that not only improves the environment, developing communities have benefited from its production.

Original farming and community livelihood

TAILORING TO YOUR NEEDS

Every building has unique performance needs and design aspirations. Whilst we supply standard Hempipanel, that can be applied across many countries and climates, our team of architect, engineer and project manager are happy to provide free pre-consultation to facilitate your decision making process on appropriate material selection.

Achieving your project design needs

ADVANTAGES OF OUR PREFINISHED INSULATED PANELS

- Fast Installation: Lightweight Panels with Detailing
- Cost Saving: Insulated and Aesthetic Timber Finishing
- Energy Saving: Excellent Thermal Performance
- Fire Resistant, Non-Combustible: Compliant to Codes (BS 476)
- Water Resistant: External and Internal wall applications
- Healthy Indoor Quality: No Mould, Fungus or Termite Growth
- Acoustic Insulation: Good Sound Reduction
- Recyclable: Cradle to Cradle Lifecycle
- Environmentally Friendly: No Toxic Contents

DESIGN VARIETIES

Patterns and Textures

Colours

APPLICATION

Climate: Developed for tropical, arid or semi arid conditions. For extreme temperate climate, additional thermal insulation is recommended.
Building Typology: Ideal for low rise commercial, residential, institutions, schools, hospitals, hotel resorts, etc
Wall application: External or internal wall.
For wet areas such as bathroom shower cubicles, additional waterproofing and waterproof wallboard backing is required.

PRODUCT DETAILS

Size: 2,400mm(L) x 600mm(W) x 140mm(D)
Detailing: Tongue and Groove side profiles
Finishing: Matt prefinished timber texture
Colour: Natural beige (alternative colours can be provided upon request)
